

GitHub

It is an Internet platform that serves as storage.

THE HISTORY OF GITHUB

It was developed by three friends in 2008.

On February 24, 2009, they managed to accumulate 46,000 public repositories.

Helps store
and
manage
codes.

Social
network
that
connects

programs

We can
interact

Thematic
forums.

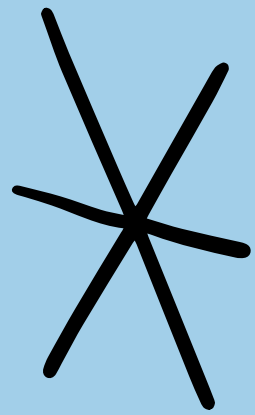

You can make
improvements

WHAT IS
GITHUB
FOR??

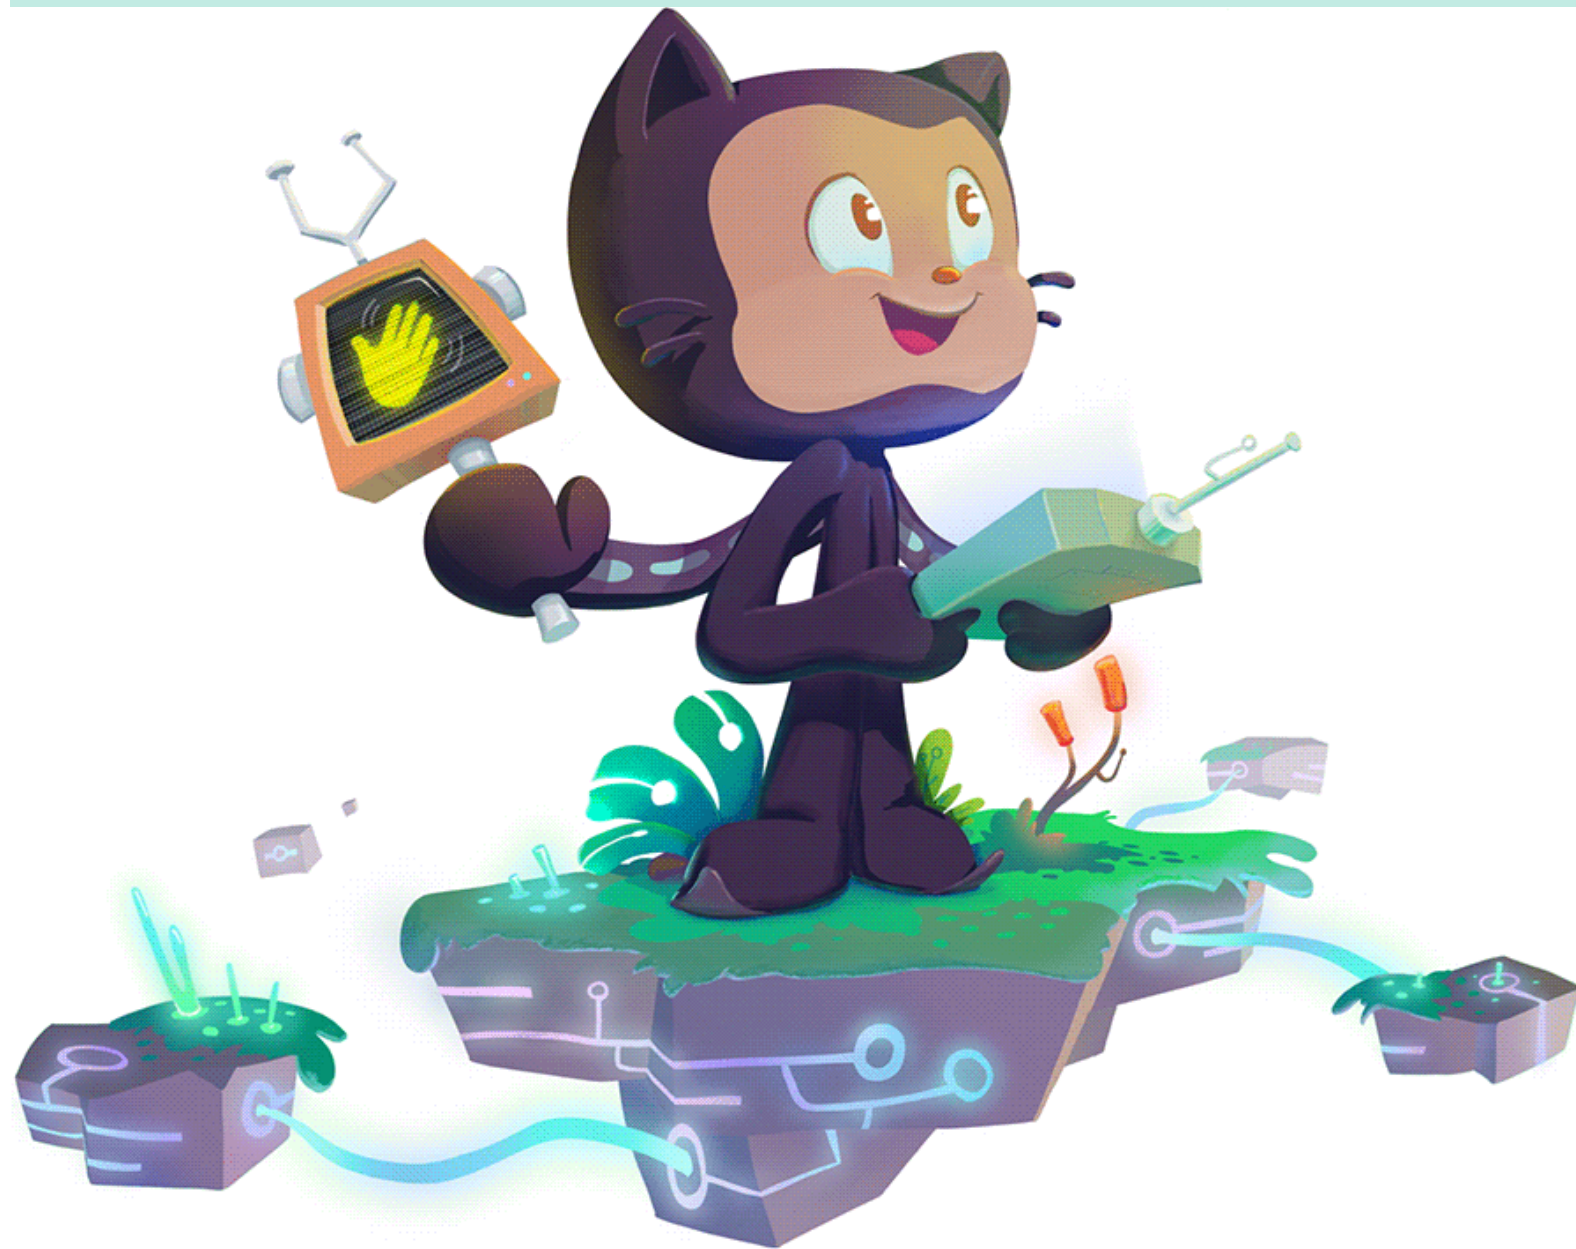

How GitHub works

1. Create an account
2. It's free
3. Log in
4. You create a new repository
5. and ready

How to create a repository

Place where all the information is stored.

Click the + symbol
drop-down menu at the
top right of the page
and choose New
repository.

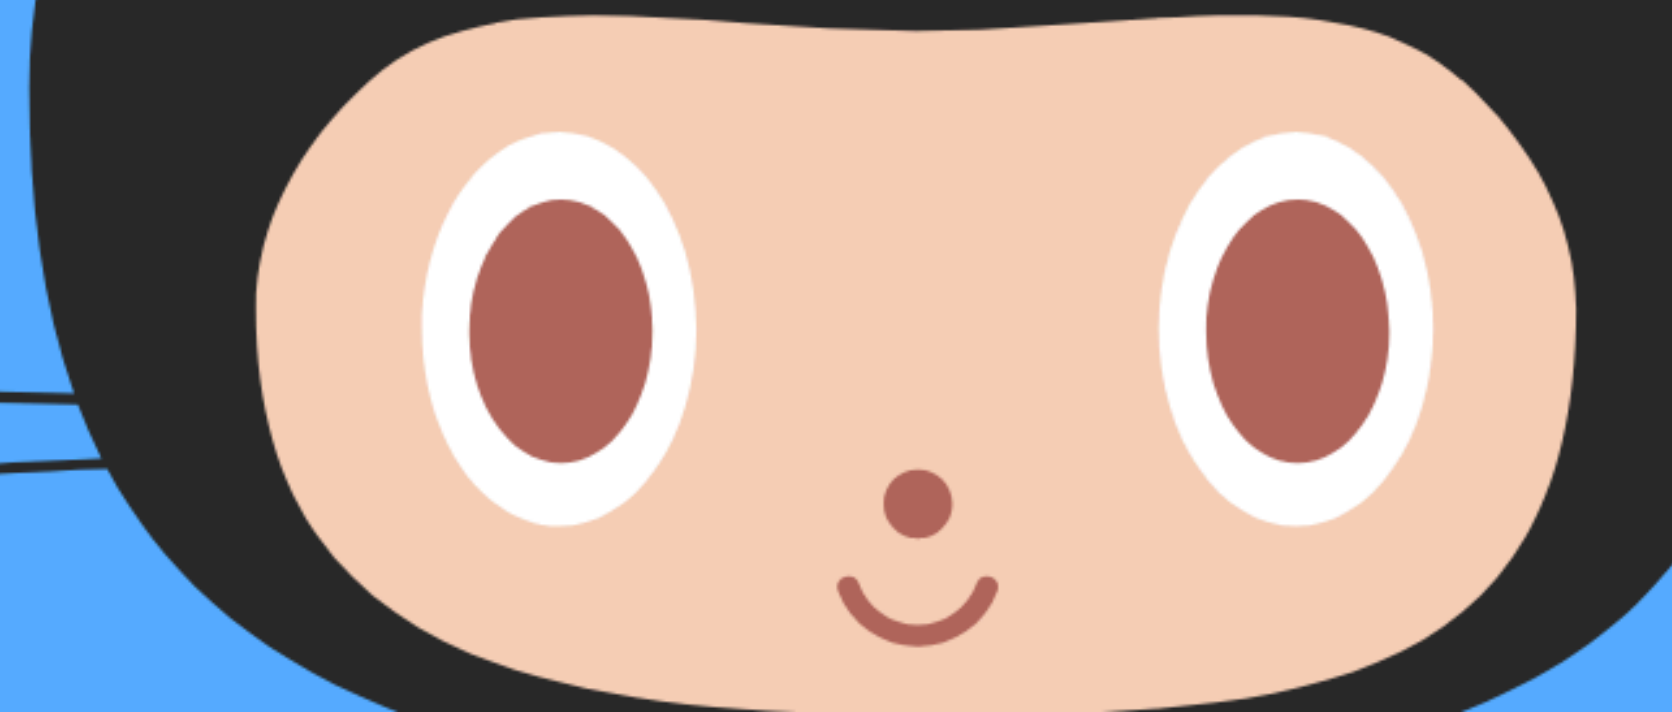

HOW TO UPLOAD A FILE TO YOUR REPOSITORY

- **ON YOUR COMPUTER**

Upload the file you want to upload to GitHub and add the file to the "stage" to push it to the local repository.

git

**THANK
YOU**
